1. FIRM OVERVIEW

Cincinnati Asset Management, Inc. has specialized in the management of fixed income strategies for individuals, financial professionals, and institutions for over 30 years.

We concentrate our efforts exclusively in the U.S. taxable corporate bond market, managing a wide range of strategies from short to intermediate duration, investment grade to high yield, as well as ESG focused. In all cases, fundamental credit research is a primary element of our security selection process.

CAM is an independent investment advisor registered with the SEC and structured as a corporation that is employee owned. The strength of our Firm lies with our niche focus, commitment to our investment process and depth of experience of our Managing Directors and employees. Our average portfolio manager experience is 30 years and we are responsible for managing \$3.2 Billion as of 12/31/21.

1.2. BENEFITS OF EMPLOYING A BOND MANAGER

CREDIT ANALYSIS

We buy bonds of companies whose credit quality is stable to improving. Continuous monitoring of the corporation's credit quality is imperative to determine when a bond's price no longer reflects its actual credit quality.

CONSISTENT APPLICATION OF AN INVESTMENT STRATEGY

Our relative value approach to buying and selling bonds meets defined objectives of intermediate maturity and best value, as well as broad diversification of holdings.

BUYING/SELLING IN THE OVER-THE-COUNTER MARKET

The bond market is an over-the-counter market that requires knowledge of historical pricing and the different bid/ask quotations of the many different market makers. Investment grade and high yield corporate bonds cover over 20,000 separate issues of over 2,000 companies; inventories are exclusive, or vary, among brokers, so having the ability to trade with best execution with many different brokers is imperative to achieving better portfolio performance.

EXECUTING IN SIZE

It is not unusual to observe significant price disparities between smaller retail executions and larger block trades. We buy/sell for all our clients in sufficient quantity in one trade to satisfy the needs of all our clients' portfolios; the smaller retail investor participates at the same price as the larger institutional client when a transaction is effected.

SPECIALIZED MANAGERS OF US CORPORATE DEBT

We believe that managing corporate bonds allows us to capitalize on the structural inefficiencies of the corporate bond market and to maximize favorable risk/reward scenarios that exist within domestic fixed income markets.

- Investors' tendency to overreact to events resulting in mispricing of securities.
- Lack of a centralized pricing source

QUALITY FOCUSED

Bottom up fundamental research

- Stable management
- Appropriately structured debt
- Good free cash flow
- Attractive relative valuations
- Structural underweight to lower rated credits

INTEREST RATE AGNOSTIC

We do not utilize interest rate anticipation tactics. We look to minimize the impact of interest rate risk from the investment process by employing defensive maturity structure within the portfolio.

1.3. INVESTMENT PHILOSOPHY

INTEREST RATE AGNOSTIC

Historically, interest rates have been hard to predict. Rarely do economists' projections match up with the actual rates a year later and often miss the direction of the rate move entirely.

10 YEAR TREASURY ACTUAL QUARTERLY AVERAGE WITH 1, 2, 3, 4 QUARTER FORECASTS

Graph 1¹

Chart 1²

	Rise	Fall	Rise	Rise	Fall	Fall
	Prediction	Prediction	Prediction Correct	Prediction Incorrect	Prediction Correct	Prediction Incorrect
1 Quarter Out	76%	24%	55%	45%	75%	25%

² Prediction Source: Philadelphia Fed Survey of Professional Forecasters. 10 Year US Treasury Yield Source: U.S. Department of the Treasury. The 10 Year US Treasury yields defined as yield as of the first day of each calendar quarter.

1.4. INVESTMENT PROCESS

Step 1:

Select issuers that possess favorable asset strength relative to their peers, an appropriate capital structure, and are trading cheap relative to the market.

Step 2:

Identify portfolio candidates which we believe have potential to increase revenues and cash flow.

Step 3:

Build our “focus list” from those candidates that we consider to have a better competitive advantage.

Step 4:

Construct portfolio through our proprietary analytical discipline that measures the yield of a security to our assessment of that security’s quality.

After the initial invest-up, our constant objective is to improve the quality, increase yield, and shorten the maturity.

1.5. RISK MANAGEMENT

The High Yield strategy utilizes a bottom-up value discipline. Risk management is an integral part of the investment process. This is important given our primary objective of preservation of capital. In addition to security selection, risk management is employed through portfolio diversification, liquidity and constant monitoring of individual credits.

Liquidity and safety are enhanced by investing only in bonds with an initial issue size generally in excess of \$100,000,000.

In efforts to mitigate risk, portfolios are constructed with a maximum exposure of approximately 12% per industry. Additionally, any sector may represent approximately 5% of the HY portion of the portfolio value or approximately 125% of the Bloomberg High Yield Index industry group weighting (whichever is greater), except the consumer cyclicals and non-cyclicals which can be weighted up to approximately 150% of the Bloomberg industry sector weighting.

Individual credits are monitored continuously; a security price decline of approximately 15% relative to broader benchmarks triggers a mandatory Credit Committee review. This action will result in a hold or sell decision. Should a price decline by approximately 25% or more, relative to broader benchmarks, that position will be sold.

1.6. STRATEGIES OVERVIEW

CINCINNATI ASSET MANAGEMENT

INTERMEDIATE

For investors interested in adding corporate bond exposure to the intermediate part of the yield curve, which has historically offered a favorable risk/reward opportunity.

Corporate Bond SMA Strategies	Target Average Credit Rating	Average Maturity	Target Diversification	Inception Date	Account Minimum ⁱⁱⁱ
Investment Grade	A3 minimum ⁱⁱ	5-10 years	20-25 issues	1/1/1993	\$100K
High Yield	Ba3 ⁱ	4-8 years	33-40 issues	4/1/1989	\$100K
Broad Market <i>67% Investment Grade / 33% High Yield Blend</i>	Baa2 ⁱ	7-9 years	55-60 issues	1/1/2002	\$300K

SHORT TERM

For investors interested in a shorter maturity profile that historically is less affected by changes in interest rates.

Corporate Bond SMA Strategies	Target Average Credit Rating	Average Maturity	Target Diversification	Inception Date	Account Minimum ⁱⁱⁱ
Short Duration <i>50% Investment Grade / 50% High Yield Blend</i>	Baa3 ⁱ	3-5 years	25-30 issues	6/1/2004	\$250K
Short Duration - Investment Grade Only	A2 ⁱⁱ	3-5 years	20 issues	12/1/2008	\$100K

ESG

For conservative investors who are interested in corporations that focus on Environmental, Social and Governance factors.

Corporate Bond SMA Strategies	Target Average Credit Rating	Average Maturity	Target Diversification	Inception Date	Account Minimum ⁱⁱⁱ
ESG Aware	A3 ⁱⁱ	5-10 years	20-25 issues	1/1/2020	\$100K
ESG Leaders	BAA ⁱⁱ	5-10 years	20-25 issues	1/1/2020	\$100K

ⁱ Moody's Rating Organization

ⁱⁱⁱ Account minimums may vary by financial institution.

2. HIGH YIELD CORPORATE BOND SMA

2.1. HIGH YIELD PORTFOLIO MANAGERS

William S. Sloneker

Bill started his career with Ohio Casualty Insurance in 1976. Prior to CAM, he was a Director and Executive Vice President of Ohio Casualty Corp., responsible for actuarial analysis and for the investment by committee of over \$2 billion in portfolios of common stocks and government, corporate and municipal bonds. B.A. English and Art History, Yale University; MBA Finance and Marketing, The Wharton School.

Richard M. Balestra, CFA

Rich began his career in 2000 with Cincinnati Financial Corporation. As a Portfolio Manager, he helped manage CFC's multi-billion dollar portfolio. He has experience with numerous asset classes including common stocks, convertible securities, investment grade bonds and high yield bonds. Rich has earned the Chartered Financial Analyst designation. B.B.A. Finance, University of Cincinnati; MBA, Xavier University.

Joshua M. Adams, CFA

Josh began his career in 2004 with Cincinnati Financial Corporation where he was responsible for managing a portion of a multibillion-dollar bond portfolio. He has focused on fixed income for the majority of his career and has extensive experience in both investment grade and high yield corporate credit. Josh has earned the Chartered Financial Analyst designation. B.S.B.A. Finance, The Ohio State University; MBA, Xavier University.

2.2. HIGH YIELD OVERVIEW

Preservation of capital is considered essential to the objective of the portfolio, which is total return over a full market/economic cycle. **This process includes a strict sell discipline.**

A bottom-up approach identifies investment opportunities that represent the most attractive value with strong prospects for consistent income and growth.

We look to minimize the overall volatility of the portfolio by focusing on the upper tier of the High Yield credit curve (Ba-B), as well as the more senior liabilities of a firm's capital structure (Senior-Subordinate Debentures).

A primary emphasis on established companies and industries leads us to avoid sectors that have precarious operating profiles.

Liquidity and safety are enhanced by investing only in bonds with an initial issue size generally in excess of \$100,000,000.

The portfolio is **diversified** across more than 35 issues. Concentration limits are observed to assure appropriate industry diversification.

A historical **low turnover** of the portfolio, on average 45% per year.

A Trading Network provides all our clients with best pricing. We access over 30 institutional broker/dealers seeking competitive bids and offerings.

3. APPENDIX

For the 3-months ended 6/30/2022, the High Yield Strategy's gross total return was -10.37% (-10.44% net of fees) underperforming the -9.83% return of the Bloomberg High Yield Index. The principal factors affecting performance were:

- 1. Credit Quality.** CAM does not purchase securities rated Caa and lower. Lower rated credit performed relatively poorly during the quarter compared to higher rated credit. The impact of CAM's underweight in lower quality credit was a +37 basis point positive contribution to excess return during the quarter.
- 2. Maturity and Duration.** At 06/30/2022 the modified duration of CAM's portfolio was 5.5 while the modified duration of the index was 4.2. Interest rates moved higher during the quarter which had a negative impact on CAM's performance relative to the index due to CAM's higher duration. The allocation effect of CAM's maturity profile served as a -129 basis point negative impact relative to the index during the quarter.
- 3. Security Selection.** CAM's security selection and weighting within the Consumer Cyclical Services industry group had the biggest positive impact on performance relative to the index with a +35 basis point contribution to excess return during the quarter. The next biggest contributor was CAM's zero weight in Pharmaceuticals with a +22 basis point contribution. As far as negative impact relative to the index was concerned, CAM's weighting and security selection within the Leisure, Cable & Satellite and the Home Construction industry groups yielded a -45, -35 and -24 basis point contribution to excess return, respectively.

For the year-to-date period ended 6/30/2022, the High Yield Strategy's gross total return was -15.78% (-15.91% net of fees) underperforming the -14.19% return of the Index. The principal factors affecting performance were:

- 1. Maturity.** At 06/30/2022 the modified duration of CAM's portfolio was 5.5 while the modified duration of the index was 4.2. Interest rates moved higher during the first half of the year which had a negative impact on CAM's performance relative to the index due to CAM's higher duration. The allocation effect of CAM's maturity profile served as a relative -240 basis point headwind to excess return during the first half of 2022.
- 2. Security Selection.** CAM's selection and positioning within the Consumer Cyclical Services industry group had the biggest positive impact on performance relative to the index during the first half of 2022 with a +29 basis point contribution to excess return during the quarter. The next biggest contributor was CAM's zero weight in Pharmaceuticals with a +23 basis point contribution. As far as negative impact relative to the index was concerned, CAM's security selection and positioning within the Leisure, Wirelines and Cable & Satellite industry groups yielded a -46, -42 and -40 basis point contribution to excess return, respectively.
- 3. Credit Quality.** CAM does not purchase securities rated Caa and lower. The performance of lower rated credit was relatively poor during the first half of the year compared to higher rated credit. The impact of CAM's underweight in lower quality credit was a +28 basis point benefit to excess return through 06/30/2022.

William S. Sloneker

Bill started his career with Ohio Casualty Insurance in 1976. Prior to CAM, he was a Director and Executive Vice President of Ohio Casualty Corp., responsible for actuarial analysis and the investment of over \$2 billion in common stocks and government, corporate and municipal bonds. B.A. English & Art History, Yale University; MBA Finance & Marketing, University of Pennsylvania, The Wharton School.

Joshua M. Adams, CFA

Josh began his career in 2004 with Cincinnati Financial Corporation where he was responsible for managing a portion of a multibillion-dollar bond portfolio. He has focused on fixed income for the majority of his career and has extensive experience in both investment grade and high yield corporate credit. Josh has earned the Chartered Financial Analyst designation. B.S.B.A. Finance, The Ohio State University; MBA, Xavier University.

Richard M. Balestra, CFA

Rich started his career with Cincinnati Financial Corporation in 2000. He has significant experience in corporate credit research and has focused on the high yield sector. Rich has held various analyst and portfolio management roles over his tenure and was most recently responsible for \$3.5 billion in firm assets. B.A. Finance, University of Cincinnati; MBA, Xavier University, Williams College of Business Administration.

Richard J. Gardner

Rick began his career with Banc One Funds in 1993. His career also includes portfolio management for The Federal Home Loan Bank and Huntington National Bank, where he managed several corporate and government bond mutual funds. Prior to joining CAM, he was a senior portfolio manager for the \$1.2 billion Ohio Police and Fire Pension Fund. B.S. Finance and Accounting, Wright State University.

Randall S. Hale

Randy started his career with Cincinnati Financial Corporation in 1984. Prior to joining CAM, Randy managed the taxable fixed income portfolio at Cincinnati Financial, an S&P 500 insurance holding company. The \$1 billion portfolio included a significant exposure to high yield securities. Responsibilities included investment strategy, research and trading. B.S. Finance, Olivet Nazarene University.

Nicholas M. Collura, CPA

Nick's career began in 2002 with 9 years of meaningful public accounting experience, primarily with KPMG LLP. At CAM he leads the team responsible for financial management and reporting, the risk and control framework, and the middle and back office operations across the firm. He is a Certified Public Accountant, holds a Certificate in Investment Performance Measurement, is a Certified Internal Auditor, and a non-practicing Certified Information Systems Auditor. B.B.A. Finance and Information Systems, Miami University.

The chart provides the annual ranking of various fixed income classes in terms of total return performance.

Cincinnati Asset Management, Inc., (“CAM”) was established in 1989 as a registered investment adviser with the United States Securities and Exchange Commission specializing in U.S. dollar denominated fixed income investments. CAM is an independent privately held corporation. CAM claims compliance with the Global Investment Performance Standards (GIPS®). Please contact us at the number referenced herein to obtain a GIPS Report or a list of composite descriptions. Performance examinations were conducted on the High Yield composite for the period April 1, 1989 through December 31, 2021, Investment Grade composite for the period January 1, 1993 through December 31, 2021 and Short Duration composite for the period June 1, 2004 through December 31, 2021. The Broad Market composite has been examined for the period January 1, 2007 through December 31, 2021. The Short Duration – Investment Grade composite has been examined for the period December 1, 2008 through December 31, 2021. The ESG Aware Investment Grade composite and the ESG Leaders Investment Grade composite have been examined for the period January 1, 2020 through December 31, 2021. Copies of the verification reports are available upon request.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The High Yield composite includes investments with credit ratings which average Ba3 with average maturity of four to eight years. The Investment Grade composite includes investments in fixed income securities with credit ratings averaging A3 with at least one investment grade credit rating and an average maturity of five to ten years. The Short Duration composite includes investments in fixed income securities with credit ratings averaging Baa3 and a target duration of three years. The Broad Market composite includes investments in fixed income securities with credit ratings averaging Baa2, an average duration between five and six years and an average maturity of seven to nine years. The Short Duration-Investment Grade composite includes investments in fixed income securities with credit ratings averaging A2 with at least one investment grade credit rating and an average maturity of two to four years. The ESG Aware Investment Grade composite includes investments in fixed income securities with credit ratings averaging A3 with at least one investment grade credit rating and an average maturity of five to ten years. The ESG Leaders Investment Grade composite includes investments in fixed income securities with credit ratings averaging BAA with at least one investment grade credit rating and an average maturity of five to ten years.

The Adviser's investment performance data conform to the following standards since inception:

- a) *The composites consist of all discretionary portfolios in each respective style under management, including all securities and cash held in the portfolios, appropriately weighted for the size of the portfolios. All portfolios are included after three months under management or upon reaching 65% invested by CAM, whichever occurs first.*
- b) *Returns are calculated monthly in U.S. dollars and include reinvestment of dividends and interest.*
- c) *Gross of fees performance results include all transaction costs and exclude management fees. When performance is compared to Lipper mutual fund averages gross performance net of CAM's management fees is used.*
- d) *For the period from April 1, 1989 through 1992, the High Yield composite includes all assets of all accounts that meet the above criteria, except that not all accounts were added to the composite by the beginning of the third full reporting period for which the account was under management. In addition, prior to 1990 certain diversification requirements were not met.*

The indices shown for comparative purposes are based on or derived from information generally available to the public from sources believed to be reliable. No representation is made to their accuracy or completeness.

“Gross Yield Comparisons”: CAM yields are for client account purchases over the last thirty days, gross before the impact of fees or expenses.

Past performance should not be taken as an indication of future results.

High Yield bonds may not be suitable investments for all individuals.

This presentation is for informational purposes and is not an offer to solicit the purchase or sale of securities.

This information is intended solely to report on investment strategies identified by Cincinnati Asset Management. Opinions and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. These charts are not intended to be used by themselves as investment advice, a recommendation to purchase or sell specific securities, or to adopt any particular investment strategy. Fixed income securities may be sensitive to prevailing interest rates. When rates rise, the value generally declines. Gross of advisory fee performance does not reflect the deduction of investment advisory fees. CAM's fees are disclosed in Form ADV Part 2A. Accounts managed through brokerage firm programs usually will include additional fees. Returns are calculated monthly in U.S. dollars and include reinvestment of dividends and interest. The indices noted are unmanaged and do not take into account fees, expenses, or transaction costs. They are shown for comparative purposes only and are based on information generally available to the public from sources believed to be reliable. No representation is made to their accuracy or completeness. It is not possible to invest directly in an index. Past performance is not a guarantee of future results.
